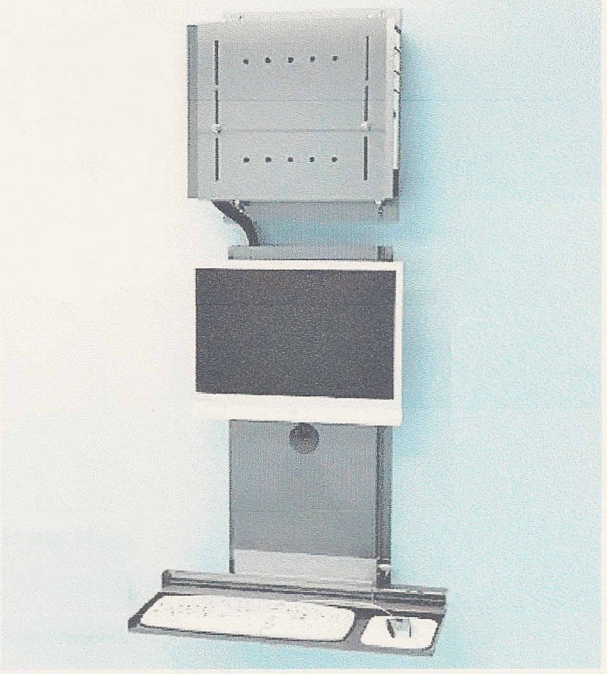
LABORATORY NO: F0803201-1
DATE: September 16, 2008
CLIENT P.O. NO.: Email, D. Weber
STANDARD: ANSI/BIFMA X5.5-08

SAMPLE: ULTRA FLAT WALL MOUNT COMPUTER STATION, MODEL UFWM

ABSTRACT

This report serves to document the testing of the above sample to all applicable test paragraphs of ANSI/BIFMA X5.5-2008, tests for office desk and table products. All applicable tests required for complete certification were performed. The remainder of this report will show how the sample submitted for testing met the requirements needed for conformance to the stated test paragraphs of the standard.



ULTRA FLAT WALL MOUNT COMPUTER STATION, MODEL UFWM

3911 E. LaPalma, Suite E, Anaheim Hills, CA 92807 Phone: (714) 630-2363 Fax: (714) 630-2256

RESULTS

Paragraph	Test Description	Test loads and Cycles	Observations
5.3	Distributed Functional Load	66 lb. load applied evenly across keyboard surface. The loading was applied for a period of 60 minutes.	**PASS**-No failure during or after the load application
5.5	Distributed Proof Load	100 lb. load applied evenly across keyboard surface. The loading was applied for a period of 15 minutes.	**PASS**-No failure during or after the load application
16	Keyboard Adjustment Test	10 lb. Load placed on keyboard. Keyboard cycled open and closed for a total of 2,500 cycles	**PASS**-No loss of serviceability after the performance of the test
17.11	Cycle test, horizontal elements	Keyboard panel was allowed to free fall drop to lowered position for a total of 500 cycles	**PASS**-No loss of serviceability after the performance of the test

CONCLUSION

During the execution of the testing program, the Ultra Flat Wall Mount computer station performed well with no structural failures or loss of serviceability. These sample submitted for testing **conforms** o all of the applicable test paragraphs of ANSI/BIFMA X5.5-2008.

Respectfully submitted,

Edwin A. Leach, Project Manager
